

AI GOVERNANCE DECISION READINESS

An Executive Game Day Workshop

Delivered by Realis Solutions Group · Powered by Entrephy Decision Arena · From AI vision to operational execution

SCOPE

Half-day or full-day hands-on workshop for executive and board-level leadership. Scenario-based, facilitated, and built around your organization's AI risk profile.

AUDIENCE

Board of Directors
C-Suite & Executive Team
Senior Risk, Legal & Technology Leadership

FOCUS AREAS

AI Strategy & Governance
Cybersecurity & Compliance Readiness
Investment & Risk Management
Board Oversight & Metrics
Executive Communications
Decision Rights & Escalation

DESCRIPTION

Entrephy and Realis Solutions Group have formed a strategic partnership to help organizations move from AI vision and governance to operational execution. Together, they deliver a seamless path from leadership alignment and decision readiness to real-world AI and digital transformation implementation.

Entrephy's Decision Arena platform delivers immersive, time-pressured simulations developed by Cliff Donathan—former CISO, AWS Principal Executive Advisor, and AWS Principal Technologist for Responsible AI—who brings 25+ years of cybersecurity and executive advisory experience. Emily Soward and Mike Reed of Realis Solutions Group, who have advised over 73% of the Fortune 100 and shaped global standards including AWS Well-Architected and HITRUST, translate those findings into an executable implementation plan.

Participants face realistic scenarios built around their industry and risk profile. The experience surfaces real gaps in decision rights, cross-functional alignment, and escalation paths—then closes with a board-ready readiness summary, named action owners, and a concrete next-steps plan from Realis.

HIGH-LEVEL AGENDA

SEGMENT	HALF-DAY (~4 HRS)	FULL-DAY (~8 HRS)
Opening & Context Setting	30 min	45 min
